- ☐ Strong Knowledge of SQL (RDMS, Joins ,Subqueries ,DML,DCL,TCL,DQL).

## PROJECT AND TRAINING

- **Objective:- Automatic Irrigation System Using Microcontroller.**

**Major Components:-** Microcontroller(8051),Soil moisture Sensor & Aurdino UNO.

**Details:-** The project is 8051 microcontroller based design which controls the water supply and the field to be irrigated. There are sensors present in each field ,once the field gets dry sensors sense the requirement of water in the field and send a signal to the microcontroller. Microcontroller then supply water to that particular field which has water requirement till the sensors is deactivated again.
